

# **Globalization and Trade Initiatives in the Arab World: Historical Context, Progress to Date, and Prospects for the Future**

*By SUSAN L. SAKMAR, J.D., LL.M.\**

## **Introduction**

**T**HE FORCES OF GLOBALIZATION during the past two decades have been particularly powerful, but for many reasons, countries in the Arab region have not participated in globalization to the extent found in other regions of the world.<sup>1</sup> Whereas most regions of the world experienced a significant increase in global trade as a percentage of total gross domestic product (“GDP”) between 1980 and 2004, trade ratios in the Arab region actually declined during this time period.<sup>2</sup>

In its 2007 *Economic Developments and Prospects* report, the World Bank found that “a legacy of protectionist trade and exchange rate policies” hindered the Middle East and North Africa (“MENA”) region’s ability to expand trade and that the “region maintained the highest level of tariff protection in the world outside of South Asia.”<sup>3</sup>

Ms. Sakmar received her LL.M. in International Law from Georgetown Law Center and her J.D. from USF School of Law where she currently teaches a seminar on International Trade Law. Her research is focused on energy, international trade, and Middle East economies. Ms. Sakmar is licensed to practice law in California and was an attorney in San Francisco prior to teaching.

1. See ROBERT Z. LAWRENCE, A US-MIDDLE EAST TRADE AGREEMENT: A CIRCLE OF OPPORTUNITY? 28–29 (2006) [hereinafter LAWRENCE, A US-MIDDLE EAST TRADE AGREEMENT] (noting that between 1980 and 2004, global trade in goods and services as a percentage of GDP increased by 32%).

2. See *id.* at 29, 30 tbl.2.2. “[B]etween 1980 and 2004, global trade in goods and services as a percentage of GDP increased by 32%,” *id.* at 29, but trade ratios in the Arab region in 2004 were the same as they were in 1980, and in some cases, had even decreased. See *id.* at 30 tbl.2.2.

3. WORLD BANK, MIDDLE EAST AND NORTH AFRICA REGION, ECONOMIC DEVELOPMENTS AND PROSPECTS: JOB CREATION IN AN ERA OF HIGH GROWTH 74 (2007) [hereinafter Eco-

These factors led the World Bank to conclude that countries in the MENA region had all fallen behind in terms of “global trade and investment integration.”<sup>4</sup>

At the start of the new millennium, many people inside and outside of the Arab region began to question whether efforts should be made to better integrate the Arab world into the changing global economy.<sup>5</sup> Notably, Saudi Oil Minister Ali Naimi publicly recognized the benefits and challenges that globalization brings to the Arab world:

We are transitioning to a global marketplace where traditional national borders are increasingly meaningless for the transfer of capital and ideas. The operative word for the future is interdependence. We are being drawn closer together by expanding global trade and investment. *Those attempting to “go-it-alone” in this new global economy will risk being left behind.*

Globalization holds the promise of a better way of life for the world’s people. But realizing this promise will not always be easy. We will be faced with tradeoffs as we try to balance economic growth, quality of life, the environment, culture and tradition.<sup>6</sup>

In an effort to enhance Arab participation in the world’s trading regime, in 2003, United States President George W. Bush proposed an initiative for a Middle East Free Trade Area (“MEFTA” or “MEFTA Initiative”) to promote trade, development, and economic growth in the Arab region.<sup>7</sup> The MEFTA Initiative called for the United States to take a series of graduated steps with countries in the region ultimately aimed at creating a region-wide free trade area by 2013.<sup>8</sup> The proposed steps included: (1) United States assistance in acceding to the

8. See BOLLE, *supra* note 7; USTR, *supra* note 7.

World Trade Organization ("WTO"); (2) expanding the Generalized System of Preferences ("GSP") program for eligible countries; (3) establishing Trade and Investment Framework Agreements ("TIFAs"); (4) establishing Bilateral Investment Treaties ("BITs"); (5) negotiating comprehensive Free Trade Agreements ("FTAs"); and (6) eventually "melding" all the FTAs into a Middle East Free Trade Area.<sup>9</sup> The MEFTA Initiative also called for the United States to provide financial and technical aid to countries for trade capacity building.<sup>10</sup>

This Article<sup>11</sup> discusses: (1) whether external trade intervention, such as the MEFTA Initiative proposed, will lead to greater economic integration of the Arab world into the multilateral trading regime; and (2) whether MEFTA can serve as the catalyst to enhance intra-regional trade and investment.

Part I of this Article provides historical background related to trade and globalization in the Arab world and discusses the historically low global and intra-regional trade and investment ratios found in the MENA region.

Part II of this Article provides a detailed analysis of the United States' MEFTA Initiative, including its policy goals and components.

Part III analyzes the potential economic impact on the MENA region of external trade intervention, such as WTO accession and the MEFTA Initiative. Part III first addresses the potential impact of WTO accession on the MENA region. Next, it addresses the potential economic impact the MEFTA Initiative might have on Arab trade with the United States. Lastly, Part III addresses whether the MEFTA Initiative has the potential to spur an increase in intra-regional trade and investment.

This Article concludes that external trade intervention, such as WTO accession and the MEFTA Initiative, offers a dynamic opportunity for the Arab region to better integrate into the world economy. While the WTO provides the forum for the multilateral trading re-

10. See *id.* The United States would "help countries develop the capacity to take part in negotiations, implement trade agreements, and build the legal and entrepreneurial infrastructure to partake in the benefits of open markets." *Id.*; see also BOLLE, *supra* note 7, at 9 (indicating that "[t]he final step in the Bush Administration's plan is trade-capacity building to help countries realize more fully the benefits of open markets . . .").

11. This Article was originally presented at an economic conference entitled the *International Conference on Globalization, Economic Reforms, Aid and Democracy in the Arab World*, held at the Arab Thought Forum in Amman, Jordan on February 3–4, 2008.

gime, the promise of MEFTA comes from its potential to encourage economic and policy reforms within the Arab region that might ultimately result in strengthened trade ties, both internationally and intra-regionally.

## I. Historical Context: The Arab Region's Historically Low Trade Ratios

### A. The Forces of Globalization Leave the Middle East Behind

As Renato Ruggiero, former Director-General of the WTO, succinctly stated, "A powerful confluence of forces drives globalization."<sup>12</sup> Some of these forces reflect government policies, and others are forces that seem to have a life of their own. The forces of globalization since the end of the Cold War have been particularly dramatic and have led many to question why the Arab region has not participated in globalization to the degree found elsewhere.<sup>13</sup>

By the early 2000s, international institutions began to recognize that the Middle East was largely missing out on trade-related growth.<sup>14</sup> According to United Nations ("UN") statistics at the time, "the [Middle East's] share of world exports peaked at 12% in 1981, but dropped to less than 5% in 2001."<sup>15</sup> Regional trade was particularly low, and in 2001, it accounted for only 8% of the region's total trade, compared to nearly 75% for Europe and 50% for Asia.<sup>16</sup> UN statistics further revealed that "the Middle East attracted only 0.7% of global foreign direct investment throughout the 1990[ ]s."<sup>17</sup>

In its 2003 *MENA Development Report*, the World Bank found that the MENA countries had "entered the new millennium at a significant deficit with respect to most other regions of the world in terms of its integration into the world economy."<sup>18</sup> While the volume of trade increased in most regions of the world over the prior two decades, trade

15. *Id.*

16. *Id.*

17. *Id.*

18. ECONOMIC DEVELOPMENTS AND PROSPECTS, *supra* note 3, at 73.

in the MENA region declined.<sup>19</sup> The ratio of trade to GDP fell from an average of 100% in 1980 to about 60% by 2000.<sup>20</sup> Regional exports were dominated by oil, and “[o]nly a few countries had established growing non-oil export sectors.”<sup>21</sup>

The MENA region also only attracted a negligible share (a mere 0.3%) of the world’s foreign direct investment.<sup>22</sup> While many factors affect the level of trade, the World Bank concluded that the MENA region’s ability to expand trade was “disadvantaged by a legacy of protectionist trade and exchange rate policies.”<sup>23</sup> The World Bank further found that “the [MENA] region maintained the highest level of tariff protection in the world outside of South Asia, with simple average tariffs in MENA averaging almost 19 percent.”<sup>24</sup>

The MENA region maintained high nontariff barriers, such as price control measures, import licenses, and quota requirements.<sup>25</sup> In addition, several factors increased the costs to trade, including “[t]echnical barriers to trade, customs, and administrative procedures, and costly and inefficient backbone services, such as transport, logistics, ICT [information and communications technology] services, and finance.”<sup>26</sup>

## B. Arab Trade with Europe and the United States Is Low

An extensive study of trade in the Arab countries reveals “considerable evidence that these [Arab] countries trade significantly less than countries with similar incomes and geographic proximity to trading partners in other parts of the world.”<sup>27</sup>

In a paper presented to the World Bank, University of Southern California Economics Professor Jeffrey Nugent used a gravity model<sup>28</sup>

24. *Id.*

25. *Id.*

26. *Id.* at 74–75.

27. LAWRENCE, A US-MIDDLE EAST TRADE AGREEMENT, *supra* note 1, at 29.

28. While a detailed discussion of international economics is beyond the scope of this paper, “[t]he gravity model of trade predicts that the volume of trade between any two countries will be positively related to the size of their economies (usually measured by GDP) and inversely related to the trade costs between them.” ROBERTA PIERMARTINI & ROBERT TEH, WORLD TRADE ORG., WTO DISCUSSION PAPERS NO. 10, DEMYSTIFYING MODELLING METHODS FOR TRADE POLICY 37 (2005), available at [http://www.wto.org/english/res\\_e/booksp\\_e/discussion\\_papers10\\_e.pdf](http://www.wto.org/english/res_e/booksp_e/discussion_papers10_e.pdf).

specification to find that the Middle East traded under its potential in the mid-1990s.<sup>29</sup> Professor Nugent “obtained shortfalls in trade with respect to Europe and the North American Free Trade Agreement (NAFTA), which he ascribes to a variety of causes, including low oil prices, high tariff barriers, poor telecommunications, capital and exchange controls, and . . . trade diversion effects.”<sup>30</sup>

Other studies using a gravity model specification also found that almost all Arab countries were far below their estimated export potential with the European Union.<sup>31</sup> One such study examined fifteen Arab countries’ exports to Europe and concluded that, on average, they were 33.5% lower than they would be, assuming that these countries’ export behavior to the European Union market is identical to any European Union country.<sup>32</sup>

The same conclusion is reached with respect to Arab trade with the United States. A 2005 economic study that examined the bilateral trade of six MENA countries (Algeria, Tunisia, Morocco, Egypt, Jordan, and Syria) with the United States found that these countries “seriously underexploited their trade potential with the United States.”<sup>33</sup> The study concluded that “in particular . . . the United States is a major untapped market for Jordan, Morocco, Syria, and Tunisia, while Algeria and Egypt ‘overexport’ to the United States.”<sup>34</sup>

### C. Intra-Regional Trade is Low

Several studies in 2005 found that Arab countries do not trade enough among themselves. One such study found that intra-regional trade between Arab countries was nearly four times less than expected.<sup>35</sup> Another study used a comprehensive gravity model that included both policy and institutional factors to explain the trade shortfalls of the MENA Region.<sup>36</sup> Researchers estimated the model “with panel data techniques based on recently assembled panel data on bilateral trade flows and the relevant explanatory variables for over

Nugent, *Explaining the Trade Shortfalls of the MENA Region* (2005) (unpublished paper presented at the MEEA-ECOMOD Conference “Middle Eastern and North African Economies: Past Perspectives and Future Challenges” held at the Free University of Brussels, June 2–4, 2005), available at [http://www.ecomod.net/conferences/middle\\_east\\_2005/middle\\_east\\_2005\\_papers/Nugent.doc](http://www.ecomod.net/conferences/middle_east_2005/middle_east_2005_papers/Nugent.doc).

150 countries for the years 1970, 1975, 1980, 1985, 1990, 1995, 1997 and 2000.”<sup>37</sup> This study verified that MENA trades too little, both intra-regionally and with countries outside the MENA region.<sup>38</sup>

## II. The United States’ Middle East Free Trade Area Initiative

In 2003, the United States, under the Bush administration, proposed establishing a United States MEFTA by 2013.<sup>39</sup> Under the MEFTA Initiative, the United States would engage countries in the MENA region in a step-by-step process designed to facilitate trade relations with the United States.<sup>40</sup> The MEFTA Initiative envisioned that these steps would lead to the negotiation of comprehensive bilateral FTAs between the United States and all countries in the region.<sup>41</sup> The United States would then combine these into a single overarching arrangement (i.e., MEFTA) between the United States and the region as a whole.<sup>42</sup> The following sections provide background on the reasoning behind the MEFTA Initiative and the step-by-step approach under it.

### A. Key Indicators of United States Economic Ties to the Middle East

United States trade with the Middle East is a small share of total United States trade, and in 2005, it accounted for only 4.1% of all United States exports and 4.6% of all United States imports.<sup>43</sup> These low numbers indicate that on the basis of economic size alone, “the Middle East is not a region on which the United States would normally be expected to focus.”<sup>44</sup> The United States’ interest in MEFTA is

---

37. *Id.* A “panel[ ] data set is one that follows a given sample of individuals over time, and thus provides multiple observations on each individual in the sample.” CHENG HSIAO, ANALYSIS OF PANEL DATA 1 (2d ed. 2003). See generally MANUEL ARELLANO, PANEL DATA ECONOMETRICS (Manuel Arellano et al. eds. 2003) (indicating that panel date econometrics uses both time series and cross-sectional data sets that have repeated observations over time for the same individuals, such as workers, households, firms, industries, regions, or countries). Numerous variables were used and included, among many others, GDP, bilateral trade between countries, distance between countries, and physical country size. See Jeffrey B. Nugent, Why Does MENA Trade So Little? 14–15 (Aug. 30, 2002) (unpublished paper presented to the Middle East Region Group at the World Bank), available at [http://lnweb18.worldbank.org/mna/mena.nsf/Attachments/Nugent/\\$File/Nugent.pdf](http://lnweb18.worldbank.org/mna/mena.nsf/Attachments/Nugent/$File/Nugent.pdf).

not primarily economic; rather, it reflects “geopolitical and security considerations” related to the United States’ war on terror and the Middle East’s strategic position as a key supplier of oil and gas.<sup>45</sup> The MEFTA Initiative also reflects the United States’ policy perspective that the Middle East region needs an economic component as part of a comprehensive strategy to address the numerous conflicts facing the region.<sup>46</sup>

## B. Background on the Middle East Free Trade Area Initiative

Initiated just a year and a half after the September 11, 2001 terrorist attacks on the World Trade Center, the Bush administration proposed the MEFTA Initiative as part of a plan to fight terrorism through the use of trade policy mechanisms designed to encourage economic growth and democratic reforms in the Middle East region.<sup>47</sup>

The MEFTA Initiative incorporated an idea that was being debated in Washington at the time—using trade as a tool to fight terrorism. For example, prior to the announcement of MEFTA, policy analyst Edward Gresser argued that the Arab world had been the “blank spot” on the Bush administration’s trade agenda and that this “undermin[ed], rather than support[ed], the war on terrorism.”<sup>48</sup> Gresser noted the “economic crisis affecting almost all of the western Muslim states” and noted that these states had “seen their share of world trade and investment collapse since 1980.”<sup>49</sup> This resulted in “stagnant growth and falling income,” as well as “unemployment, political tension, and rising appeal for religious extremists.”<sup>50</sup> Gresser further argued that “a strategic initiative for the Muslim world could end, or at least ease, the tilt.”<sup>51</sup> Gresser called for an initiative “analogous to programs now available for Central America, the Andean nations, and Africa” in order to promote “growth and creation,

51. *Id.*

and so reduc[e] the attraction of radicalism and religious fundamentalism.”<sup>52</sup>

Brink Lindsey of the CATO Institute argued for an initiative that could generate immediate results to supplement the Bush administration’s pursuit of FTAs, which take longer to negotiate.<sup>53</sup> The short-term initiative Lindsey proposed was legislation that would grant “temporary duty-free, quota-free access to the U.S. market for exports of selected Muslim countries.”<sup>54</sup> Lindsey argued that this shorter-term program would prove the United States’ “commitment to the region, thereby providing a jump-start for the longer, arduous process of negotiating FTAs.”<sup>55</sup>

The policy objectives Gresser and Lindsey suggested were later supported by *The 9-11 Commission Report*, which included the following recommendation: “A comprehensive U.S. strategy to counter terrorism should include economic policies that encourage development, more open societies, and opportunities for people to improve the lives of their families and to enhance prospects for their children’s future.”<sup>56</sup> In summary, the premise of the United States’ MEFTA Initiative was that an economic boost to the region could help alleviate the poverty, weak institutions, and corruption that were believed to make some countries vulnerable to terrorist networks.<sup>57</sup>

On June 23, 2003, at the World Economic Forum in Jordan, United States Trade Representative Robert Zoellick provided further details on the MEFTA Initiative.<sup>58</sup> In terms of eligibility, the Bush administration’s MEFTA Initiative is open to: (1) “‘peaceful’ countries that seek an increased trade relationship with the United States”; and (2) “all those countries that are prepared to participate in economic reform and liberalization.”<sup>59</sup>

Ambassador Zoellick outlined a six-step process, or “roadmap to MEFTA,” for Middle East countries to become part of MEFTA.<sup>60</sup>

These six steps included: (1) the United States assisting countries in joining the WTO; (2) participating in the GSP;<sup>61</sup> (3) entering into TIFAs; (4) entering into BITs; (5) entering into FTAs with the United States; and (6) eventually “melding . . . subregional FTAs into an historic regional [MEFTA].”<sup>62</sup> Ambassador Zoellick also indicated that “the final element” of the MEFTA Initiative included the United States providing financial and technical aid to fund trade capacity building in the region.<sup>63</sup> As envisioned, MEFTA would ultimately cover twenty countries in the Middle East<sup>64</sup> and North Africa<sup>65</sup> region.

## C. The Step-by-Step Middle East Free Trade Area Initiative

### 1. World Trade Organization Accession

It is the United States’ position that Arab countries that join the rules-based system of global trade by accession to the WTO will be better able to take advantage of the benefits of open markets and globalization.<sup>66</sup>

At the beginning of the new millennium, nine countries in the MEFTA region were members of the WTO: Bahrain, Cyprus, Egypt, Israel, Kuwait, Morocco, Qatar, Tunisia, and the United Arab Emirates<sup>67</sup> (“UAE”). Over the past seven years, three additional MEFTA countries have joined the WTO: Jordan, Oman, and Saudi Arabia.<sup>68</sup>

In April 2000, Jordan became the 136th member of the WTO six years after establishing a working party under the General Agreement on Tariffs and Trade<sup>69</sup> (“GATT”) and with significant assistance from

---

61. The GSP is “a program designed to promote economic growth in the developing world [and] provides preferential duty-free entry for more than 4,650 products from 143 designated beneficiary countries and territories.” USTR, Generalized System of Preferences, [http://www.ustr.gov/Trade\\_Development/Preference\\_Programs/GSP/Section\\_Index.html](http://www.ustr.gov/Trade_Development/Preference_Programs/GSP/Section_Index.html) (last visited Mar. 26, 2008).

69. Press Release, WTO, Jordan Becomes 136th Member of the WTO (Apr. 11, 2000), [http://www.wto.org/english/news\\_e/pres00\\_e/pr174\\_e.htm](http://www.wto.org/english/news_e/pres00_e/pr174_e.htm) [hereinafter Press Release, WTO, Jordan] (reporting that Jordan became a member of the WTO in 2000 after first establishing a working party under the GATT in January 1994). “The working party on

the United States.<sup>70</sup> Jordan's accession was hailed as a "historical moment" and "a turning point in the continued development of the Jordanian economy."<sup>71</sup> In November 2000, the Sultanate of Oman became the 139th member of the WTO after concluding negotiations that began in 1996.<sup>72</sup> In December 2005, Saudi Arabia became the 149th member of the WTO after almost twelve years of negotiation.<sup>73</sup> Saudi Arabia's accession was a historic day for the WTO and brought to the "multilateral table" the thirteenth largest merchandise exporter and the twenty-third largest importer.<sup>74</sup> Given its position as the "swing" energy producer and its historical lack of transparency, Saudi Arabia is perhaps the most significant Arab state to join the WTO.

All but one of the remaining MEFTA countries (Algeria, Iran, Iraq, Lebanon, and Yemen) are in the process of negotiating their accession to the WTO.<sup>75</sup> The only exception is Libya, which has been granted observer status but has not yet started the accession process.<sup>76</sup>

As a practical matter, however, WTO accession takes years, and the United States has recognized that WTO accession is not an immediate answer to United States security concerns related to the Arab

region.<sup>77</sup> As former United States Trade Representative Charlene Barshefsky acknowledged, “programs of a more immediate nature” are “critical to bring economic and job growth to [the MENA] region to provide hope and a counterweight to a large growing, relatively well-educated but unemployed population.”<sup>78</sup> Barshefsky also recognized the need for greater economic integration in the region by stating that “we need the kind of relief that may help these countries integrate one with the other.”<sup>79</sup>

## 2. Continuation of the Generalized System of Preferences

The short term plan under MEFTA includes the continuation of the GSP, which allows duty-free entry into the United States market for at least 3500 products from 140 developing countries.<sup>80</sup> As of 2006, only eight of the twenty countries covered under MEFTA were eligible for GSP benefits: Algeria, Egypt, Iraq, Jordan, Lebanon, Oman, Tunisia, and Yemen.<sup>81</sup>

The GSP provisions of the United States’ Trade Act of 1974<sup>82</sup> also limit product preferences on the basis of import sensitivity.<sup>83</sup> GSP provisions specifically exclude from tariff preferences certain textiles and apparel, watches, footwear, handbags, luggage, wallets and briefcases, work gloves and other leather wearing apparel, steel, glass, and electronics.<sup>84</sup> Because these are important export categories for MEFTA countries, imports under GSP represent only a small fraction (0.2% for 2005) of all imports from the MEFTA region.<sup>85</sup>

### 3. Trade and Investment Framework Agreements

TIFAs "establish a framework for expanding trade and for resolving outstanding disputes."<sup>86</sup> Since the MEFTA Initiative was announced in 2003, the United States has negotiated new TIFAs with eight countries: Iraq, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, the UAE, and Yemen.<sup>87</sup> Nearly three-quarters of the MEFTA entities (fourteen) now have TIFAs with the United States.<sup>88</sup> The six MEFTA entities that do not have TIFAs with the United States are: Cyprus, the Gaza Strip and the West Bank, Iran, Libya, and Syria.<sup>89</sup>

### 4. Bilateral Investment Treaties

"[ ]BITs[ ] oblige governments to treat foreign investors fairly and to offer them legal protections equal to those afforded domestic investors," and they make the business climate of a country more attractive to United States companies.<sup>90</sup>

Since the MEFTA Initiative was announced, the United States and Jordan have approved a BIT.<sup>91</sup> Subsequently, the United States now has BITs with more than one-quarter of the MEFTA entities: Bahrain, Egypt, Israel, Jordan, Morocco, and Tunisia.<sup>92</sup>

The following fourteen MEFTA entities do not have BITs with the United States: Algeria, Cyprus, the Gaza Strip and the West Bank, Iran, Iraq, Kuwait, Lebanon, Libya, Oman, Qatar, Saudi Arabia, Syria, the UAE, and Yemen.

### 5. Free Trade Agreements

Since the MEFTA Initiative was announced, the United States completed FTAs with Bahrain, Morocco, and Oman, and an FTA with

the UAE is under negotiation.<sup>93</sup> FTAs were already in effect for Israel and Jordan.<sup>94</sup> Some have questioned whether these FTAs will be effective, and in light of the MENA region's historical reluctance "to engage in . . . fundamental systemic changes," some skepticism is probably warranted.<sup>95</sup> Some have also questioned the benefits of the FTAs in light of the relatively modest trade and investment links between the Arab countries and the United States.<sup>96</sup>

Although some skepticism might be warranted, it is important to note that the FTAs with Bahrain, Morocco, and Oman are particularly striking because of their "comprehensive and deep character."<sup>97</sup> Unlike other FTAs, these new FTAs require liberalization for trade in all goods, including agriculture, and for many services and foreign direct investment.<sup>98</sup> The requirements of the FTAs are enforced by dispute settlement agreements backed by the possibility of the suspension of trade concessions or preferences, payment of monetary assessments by violators of FTAs, or both.<sup>99</sup>

The "deep character" of these FTAs is significant because, with the exception of the Gulf Cooperation Council, most previous agreements that Arab countries signed—both with the European Union and amongst themselves—generally dealt only with tariffs and quotas.<sup>100</sup> Although tariffs in the region have been reduced, Arab countries "have failed . . . to deal effectively with non-tariff barriers and the liberalization of services and investment."<sup>101</sup>

A strong argument can be made that the deep nature of the United States' FTAs in the MENA region presents a unique opportunity for the Arab states to implement additional policy measures, both individually and collectively.<sup>102</sup> Thus, "[t]he promise of the [FTAs] comes from the ability to use them as a catalyst for increased eco-

nomic benefits by improving regulatory rules and systems at home and facilitating integration with the rest of the region and the world.”<sup>103</sup>

## 6. The Creation of a Middle East Free Trade Area

As Ambassador Zoellick outlined, the MEFTA Initiative envisions the “eventual melding of [the] subregional FTAs into an historic regional Middle East Free Trade Area.”<sup>104</sup> The difficulty of ultimately establishing one MEFTA has been recognized,<sup>105</sup> and Ambassador Zoellick noted, at the time, that a MEFTA “will not be created in a month, a year, or even five years. But America is committed for the long haul, through a step-by-step strategy for progress that will help nations build free, dynamic economies and rising standards of living for all.”<sup>106</sup>

The final element that Ambassador Zoellick noted in the MEFTA Initiative is “the [United States’] provision of financial and technical aid to help countries develop the capacity to take part in negotiations, implement trade agreements, and build the legal and entrepreneurial infrastructure to partake in the benefits of open markets.”<sup>107</sup>

To fund trade capacity building under the MEFTA Initiative, “[t]he Middle East Partnership Initiative [“MEPI”] will help target more than \$1 billion of annual funding from various U.S. Government agencies and encourage partnerships with private organizations and businesses that support development.”<sup>108</sup>

The MEPI “is also aimed at increasing educational opportunities, strengthening civil society and rule of law, and supporting small business.”<sup>109</sup> The MEPI received an estimated \$294 million in funding between fiscal years 2002 and 2005.<sup>110</sup> For 2005, total funding for United

105. LAWRENCE, A US-MIDDLE EAST TRADE AGREEMENT, *supra* note 1, at 19 (noting that “even aside from the obvious political problems of achieving a single MEFTA that includes Israel and all the Arab countries, there are numerous institutional barriers to its full realization”). See also *id.* at 55–77, for a more detailed discussion of the issues related to creating a single MEFTA.

106. Zoellick, *supra* note 9.

107. *Id.* It should be noted that for some reason both Bolle and Lawrence treat trade capacity as step six, whereas Ambassador Zoellick’s speech identified trade capacity building as an “element” and not a step. See BOLLE, *supra* note 7, at 9; LAWRENCE, A US-MIDDLE EAST TRADE AGREEMENT, *supra* note 1, at 2.

108. Zoellick, *supra* note 9. MEPI is the trade capacity building program that MEFTA uses. *See id.*

109. BOLLE, *supra* note 7, at 9.

110. *Id.*

States trade capacity building was \$1.3 billion, of which Middle East countries received \$236 million, or 18%.<sup>111</sup>

### III. The Economic Impact of External Trade Intervention

As the World Bank's 2007 *Economic Developments and Prospects* report for the MENA Region notes, "The relationship between openness to international trade and income growth is almost axiomatic. . . . economies with greater openness to international trade experience higher rates of economic growth, as a result of both higher investment levels and sustained gains in productivity."<sup>112</sup> Perhaps of greater significance to the Arab region is the ancillary benefit that greater openness can "motivate the overall reform agenda."<sup>113</sup> Over the past several years, countries in the MEFTA region have embarked on a variety of trade reforms designed "to liberalize their trade regimes and remove the many existing impediments to greater trade."<sup>114</sup>

#### A. The Impact of World Trade Organization Accession

Since the beginning of the new millennium, three MENA countries have joined the WTO: Jordan, Oman, and Saudi Arabia.<sup>115</sup> As a result of WTO accession, MENA countries as a whole have made significant progress in tariff reduction since the start of the decade.<sup>116</sup>

In particular, Jordan made significant commitments in trade reform as a condition of its accession to the WTO in 2000 and the implementation of the United States FTA in 2001.<sup>117</sup> Tariffs decreased by about half from an average of 23% in 2000 to less than 12% by 2005.<sup>118</sup>

The most recent Arab member of the WTO is Saudi Arabia, which was admitted in 2005.<sup>119</sup> In order to meet WTO requirements, Saudi Arabia revised many of its protective trade policies, particularly with respect to import licensing, customs valuation and fees, standards

112. ECONOMIC DEVELOPMENTS AND PROSPECTS, *supra* note 3, at 73 (footnotes omitted).

113. *Id.*

114. *Id.* at 75. For example, additional countries from the MENA region (Jordan, Oman, and Saudi Arabia) have acceded to the WTO, and numerous bilateral and regional trade agreements have entered into force in the region. *Id.* As a result of the various trade agreements, MENA countries made significant progress in reducing tariffs. *Id.*

119. *Id.* at 76.

and technical regulations, and legislation for intellectual property rights and patent registration.<sup>120</sup>

Relative to the world, tariff reform by MENA countries since 2000 has been higher than any other region but Europe and Central Asia, ranking in the top sixty-second percentile of countries worldwide.<sup>121</sup>

Despite the progress MENA countries have made in the WTO, recent WTO reports indicate that more structural reforms need to occur.<sup>122</sup> For example, in 2006 the WTO conducted its first ever Trade Policy Review of the UAE.<sup>123</sup> The WTO's Trade Policy Review found that the UAE's generally liberal economy had grown by an average of 6% per year over the past decade and 9% between 2003 and 2005.<sup>124</sup> Despite some diversification, however, the UAE remains dependent on crude oil and gas exports for a significant share of its national income.<sup>125</sup> The WTO Secretariat noted that "internal barriers to trade, resulting largely from the absence of a competition policy, institutional weaknesses, and restrictions on foreign participation in the economy, are impediments to doing business in the UAE and are hindering the diversification into services, a sector that is rapidly becoming a strategic priority."<sup>126</sup>

## B. The Middle East Free Trade Area Initiative's Potential Impact on Arab Trade with the United States

The relatively small value of bilateral trade between Arab countries and the United States implies that the economic impact of MEFTA will be marginal. Since the United States has historically charged very low duties on imports from Arab countries (just over 0.5% in 2003),<sup>127</sup> it is unlikely that MEFTA will significantly increase exports from Arab countries to the United States. Rather, the more

---

125. *Id.*

126. *Id.*

127. See LAWRENCE, A US-MIDDLE EAST TRADE AGREEMENT, *supra* note 1, at 106; Lawrence, *Recent US Free Trade Initiatives*, *supra* note 95, at 16.

likely result of tariff reductions under MEFTA is that imports from the United States will increase.<sup>128</sup>

Focusing exclusively on the effects of eliminating tariffs on goods, however, runs the risk of seriously understating the impact of the MEFTA agreements, especially the FTAs. Some argue that “[t]he additional effects of reducing non-tariff barriers and the liberalization of services trade and foreign investment should not be ignored,” and “[s]imulations of these additional effects suggest they could be large.”<sup>129</sup> For example, estimates using Tunisia and Egypt indicate that “liberalization of foreign investment in services that is generalized to all trading partners could boost welfare by almost ten percent of GDP.”<sup>130</sup>

Simulation models often assume the structure of trade will remain unchanged, which can lead to misleading results.<sup>131</sup> For example, the International Trade Commission’s analysis of the United States-Jordan FTA completely missed the explosion in Jordan’s exports of clothing to the United States as a result of special trade concessions that the United States granted Jordan.<sup>132</sup> Indeed, the United States-Jordan FTA provides valuable insight into the impact that stronger trade and investment relations can have on economic development. As a result of the various trade agreements between the United States and Jordan, Jordan’s exports to the United States “grew from \$13 million in 1999 to \$412 million in 2002; created over 30,000 direct new jobs, and attracted over \$200 million in new investment from 11 different countries.”<sup>133</sup> Recent data is even more impressive: “Jordanian exports to the US increased from \$72.8 million in 2000 to a stunning \$1.267 billion in 2005 . . .”<sup>134</sup>

General trade data also suggests that United States’ exports to and imports from the MENA region have increased since MEFTA was announced.<sup>135</sup> “Between the end of 2002 and the end of 2005 . . . U.S. exports to the [MENA] countries grew by 56% while U.S. imports from these entities nearly doubled.”<sup>136</sup> The greatest growth in United States imports from the MENA region was in petroleum and natural

136. *Id.*

gas.<sup>137</sup> Imports of nonmetallic mineral manufactures, medicinal and pharmaceutical products, and organic chemicals also increased.<sup>138</sup> Goods making large contributions to the growth in United States exports to the MENA region included transport equipment, road vehicles, electrical and non-electrical machinery, non-metallic mineral manufactures, telecommunications, and scientific instruments.<sup>139</sup>

### C. The Middle East Free Trade Area Initiative May Lead to Increased Intra-Regional Trade

According to the Bush administration, the six-step MEFTA Initiative is aimed at addressing political, economic, and humanitarian objectives to assist the Middle East countries in becoming “sustainable trading partners.”<sup>140</sup> “The hope is that each of the successive steps involved in negotiating TIFAs, BITs, and FTAs might help induce internal changes in the laws and regulations of the various countries.”<sup>141</sup>

One of the stated goals of the MEFTA Initiative was also to encourage intra-regional trade.<sup>142</sup> Prior to the announcement of the MEFTA Initiative, intra-regional trade accounted for only 8% of the total trade in the region.<sup>143</sup> The United States intended to “focus efforts on improving this number,” noting that “[s]trong regional ties often lead to rapid expansion in trade flows and economic growth.”<sup>144</sup> Thus, the United States hoped and expected that, as its bilateral trade and ties expand in the region, “trade *among* the countries in the region [would] also grow and expand.”<sup>145</sup>

The Arab countries that have signed agreements with the United States should use them as an opportunity to enhance Arab regional integration by extending the MEFTA provisions and coverage to each other. They should also use the agreements to leverage trade and investments liberalization with other trading partners.

If the MEFTA provisions are extended throughout the region, then there is likely to be a measurable increase in intra-regional trade.

---

137. *Id.* During this time period, petroleum and natural gas prices and volume traded increased, which affected imports. *Id.*

138. *Id.* at 6–7.

139. *Id.* at 7 (footnote omitted).

140. *Id.* at 10 (quoting transcript of Background Press Conference Call to Discuss Proposed Mideast Free Trade Area Announced by President Bush, May 9, 2003).

141. *Id.*

142. Wayne, *supra* note 14.

143. *Id.*

144. *Id.*

145. *Id.*

At this point, it is unclear whether the Arab countries will apply the MEFTA provisions intra-regionally and whether the potential for increased intra-regional trade under MEFTA will be realized.

#### IV. Conclusion

The Arab world has enjoyed spectacular rates of growth for the past four years. While high oil prices have spurred this growth, there is no doubt that intensified global trade linkages have also contributed.

When the MEFTA Initiative was announced in 2003, the stated goal was to conclude the plan in a decade, by 2013. This was an ambitious goal at the time, and the United States has recently indicated that the overall objective of MEFTA “was not to meet the deadline but to push the reform process in the region along.”<sup>146</sup>

Scholars generally agree that the MEFTA Initiative is a step in the right direction and that the deep nature of the MEFTA initiatives presents a dynamic opportunity for Arab countries to implement economic reforms that will allow the region to better integrate into the multilateral trading regime. It remains to be seen whether countries in the MENA region will continue to move the reform process along, but it is evident that the Arab countries that do not embrace the changes necessary to compete in the new global economy will “risk being left behind.”
